

Introducing The Finest Engineered Rug Spinner In the World*

“At RugBadger.com, we refuse to compromise on engineering, materials or component quality”

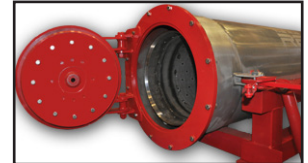

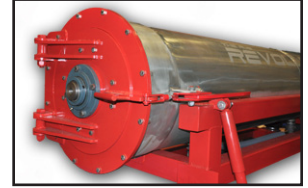

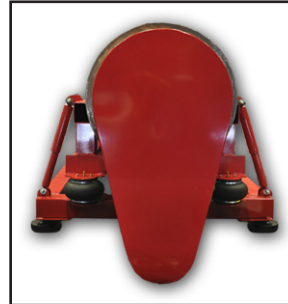

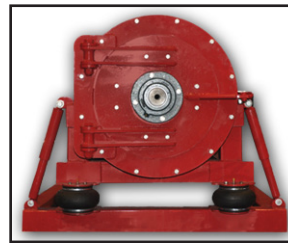

Features	Pro-SS	Blue Competition	OverSeas Competition
USA Engineered, Built & Serviced	✔	✔	No
Best Warranty in the business* see our website	✔	No	No
Engineered from the ground up to spin a fully soaked, full size 90 line Chinese rug without bogging down or overheating the bearings	✔	?????	?
SPEED: 1400 RPM for much faster extraction of water so your rugs will pass the dry knee drop test	✔	?	No
Largest sized rug spinners in the world so you can run even a 16'4" rug inside the cylinder	✔	No	?
Stainless steel inside cylinder for decades of rust free service with no painting required	✔	No	?
Stainless steel outside cylinder for decades of rust free service with no painting required	✔	No	?
Safe full 4 corner airbag suspension	✔	No	?
Safe full 4 corner hydraulic suspension	✔	No	?
Strongest possible model of motor using Baldor Gold series	✔	?	No
PLC controls for infinite control of speeds up to 1400 RPM	✔	No	?
Switches/Buttons/Controls separate from machine to protect from damaging vibrations & water	✔	No	?
Jog feature to easily “unstuck” rugs when finished extracting	✔	?	?
Locking safety door that must be shut before machine will safely run	✔	No	?
EZ lifter/loader system for heavy rugs included in your purchase	✔	No	?
2 Port Design to load from both ends	No **	✔**	?
Largest rinse port in the industry to easily and fully rinse stinky rugs while in spin cycle	✔	No	No
Runs super quiet to not disturb your office staff or neighbors	✔	No	?

Call 1-866-885-7847 right now for more details or visit www.RugBadger.com/rugrevolutions

*We believe that the RR PRO-SS is the finest engineered rug spinner on the planet and stand behind our engineering with the strongest warranty in the industry with a 20/5/3/2 warranty. (ask for details)

** Although a 2 port design is an interesting idea, in practical terms you need double the space to take advantage of it. Our research has revealed space in most rug cleaning facilities is limited and would likely never be able use a 2 port design. For example a 14' model means you'll need the machine centered in a 42' room to fully take advantage of this feature. The other consideration with a 2 port design is it has a much slower RPM and rugs will not wring water out anywhere near as well as the advanced engineering built into the RugRevolution Pro-SS.

RugRevolution Specifications

Footprint

- model 1000 @ 42"x 12.3"
- model 1300 @ 42"x 15'3"
- model 1600 @ 42"x18'3"

Usable Length

- Model 1000 @ 10'4"
- Model 1300 @ 13'4"
- Model 1600 @ 16'4"

Inner Diameter @ 18"

RPM @ 1400

Rinse port size @ 1"

✔ Power

All RugRevolutons are built to take advantage of your buildings power supply and will be set to run on either single or three phase power

✔ Bearings

All RugRevolutons are built to take advantage of your buildings power supply and will be set to run on either single or three phase power

✔ Stainless Steel Tubes

The inside tube is 3/16 inch 316 Stainless Steel. The outside tube is 1/8 inch polished 304 Stainless Steel

✔ Support Carriage

The support carriage is all 4 inch 1045T mild steel

The Warranty

- ✔ 20 years anti-rust perforation guarantee on all stainless steel parts
- ✔ 5 year warranty against fatigue failure on all metal parts
- ✔ 3 year limited warranty for bearings
- ✔ 2 year limited warranty on motors and electronic controls

Warranty is limited to parts and freight on all parts. Downtime and your labour is not included. We will ship you parts at our cost and you are responsible for installation with phone directions from our engineer.
